

ESC's Contractor Education Program

For Architects, Engineers, Consultants, Contractors & Installers

The **Contractor Training Program** is designed to educate an array of contractors that work hand in hand with gas utilities to deploy gas appliances and equipment for commercial and industrial use. Track I of this program focuses on the advantages of natural gas relative to other fuels, operating and performance characteristics of gas equipment and, environmental and efficiency issues associated with their use.

Contractor Training Program Units

- Unit 1: The Benefits of Natural Gas Appliances and Equipment
- Unit 2: Overview of Gas Equipment for Commercial Applications
- Unit 3: Environmental Considerations & Carbon Footprint
- Unit 4: Hot Water Heating Solutions
- Unit 5: Combined Heat and Power (CHP)
- Unit 6: Gas Air Conditioning & Gas Heat Pumps (GHP)
