We're Extreme Weather Ready You Can Be, Too

Liberty works throughout the year to prepare for extreme weather. From inspecting and maintaining our gas lines and weatherizing our equipment to training our teams, we are ready to respond 24/7 to help keep service safe and reliable.

Are you ready? Use our extreme weather preparation checklist to help you and your loved ones prepare.

Follow us on social media to see all that goes in to providing you with reliable natural gas service.

Smell Gas? Here's What to Do

The smell of leaking natural gas is often compared to rotten eggs. If you smell something resembling this, exit your property immediately. When you arrive at a safe spot, **call us at 1-800-673-3301 or call 911**. If you smell gas, DO NOT use electrical switches, appliances, garage door openers, etc.

This can cause sparks. Instruct others to leave and evacuate the premises immediately. For more important safety information regarding natural gas and ways to identify a gas leak, visit www.libertyenergyandwater.com.

Monthly Maintenance: Check Your Batteries

Please take the time to test smoke and carbon monoxide detectors monthly. Batteries should be replaced every six months. These two devices can save your life in the event of a fire or a buildup of carbon monoxide (CO).

Protect Your Family From Carbon Monoxide

Carbon monoxide (CO) is an odorless, colorless and toxic gas. CO is produced whenever any fuel is burned, including gas, oil, kerosene, and wood. If appliances that burn fuel are maintained and used properly, the amount of CO produced is usually not hazardous. However, if appliances are not working properly or are used incorrectly, dangerous levels of CO can result.

If your CO alarm is activated or someone suddenly starts experiencing headaches, nausea, dizziness, ringing in the ears, spots before the eyes, or reddened skin color, **get to fresh air immediately and call 911 and Liberty at 1-800-673-3301**.
